

$$884 - 225 = 659 (\text{cm}^2)$$

$$(2) \quad 30 \times 35 = 1050 (\text{cm}^2)$$

$$10 \times 18 = 180 (\text{cm}^2)$$

$$1050 - 180 = 870 (\text{cm}^2)$$

$$\textcircled{3} (1) \quad (20 + 12) \times 40$$

$$= 1280 (\text{cm}^2)$$

$$20 \times 16$$

$$= 320 (\text{cm}^2) \quad \dots \textcircled{ア}$$

$$8 \times 10$$

$$= 80 (\text{cm}^2) \quad \dots \textcircled{イ}$$

$$1280 - 320 - 80 = 880 (\text{cm}^2)$$

$$(2) \quad (18 + 12) \times (20 + 10)$$

$$= 900 (\text{cm}^2)$$

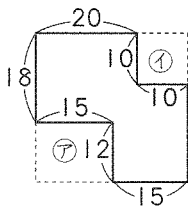

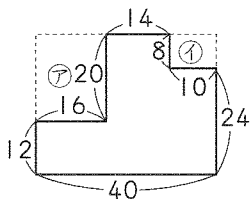

$$12 \times 15$$

$$= 180 (\text{cm}^2) \quad \dots \textcircled{ア}$$

$$10 \times 10$$

$$= 100 (\text{cm}^2) \quad \dots \textcircled{イ}$$

$$900 - 180 - 100 = 620 (\text{cm}^2)$$

25

第10章 面積
大きな面積

◆解答◆

① (1) 40000 cm^2

(2) 1500 ha
