| ① | (1) 350cm^2 | (2) 600cm^2 |
| | (3) 440cm^2 | (4) 375cm^2 |
| ② | (1) 659cm^2 | (2) 870cm^2 |
| ③ | (1) 880cm^2 | (2) 620cm^2 |

◆解説◆

① 2つに分けたり, 全体からひいたりして求めます。

$$(1) 10 \times 15 = 150 (\text{cm}^2)$$

$$20 \times 10 = 200 (\text{cm}^2)$$

$$150 + 200 = 350 (\text{cm}^2)$$

$$(2) 24 \times 30 = 720 (\text{cm}^2)$$

$$12 \times 10 = 120 (\text{cm}^2)$$

$$720 - 120 = 600 (\text{cm}^2)$$

$$(3) 8 \times (30 - 8 - 12)$$

$$= 80 (\text{cm}^2)$$

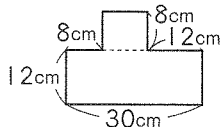

$$12 \times 30 = 360 (\text{cm}^2)$$

$$80 + 360 = 440 (\text{cm}^2)$$

$$(4) 20 \times 30 = 600 (\text{cm}^2)$$

$$15 \times 15 = 225 (\text{cm}^2)$$

$$600 - 225 = 375 (\text{cm}^2)$$

② 全体からあいている部分をひいて求めます。

$$(1) 26 \times 34 = 884 (\text{cm}^2)$$

$$15 \times 15 = 225 (\text{cm}^2)$$
