

$$884 - 225 = 659 (\text{cm}^2)$$

$$(2) \quad 30 \times 35 = 1050 (\text{cm}^2)$$

$$10 \times 18 = 180 (\text{cm}^2)$$

$$1050 - 180 = 870 (\text{cm}^2)$$

$$\text{3} \quad (1) \quad (20 + 12) \times 40$$

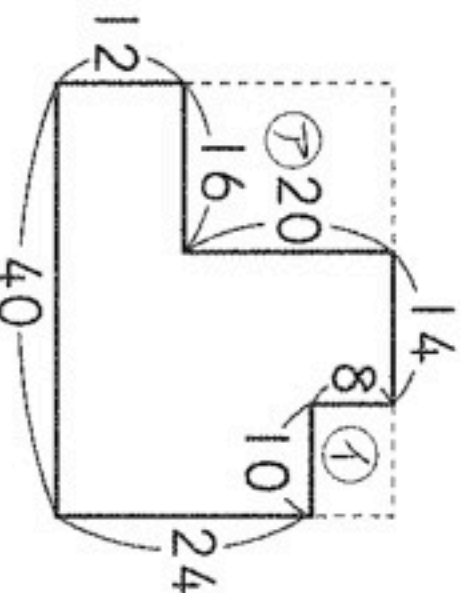

$$= 1280 (\text{cm}^2)$$

$$20 \times 16$$

$$= 320 (\text{cm}^2) \quad \dots \text{㊦}$$

$$8 \times 10$$

$$= 80 (\text{cm}^2) \quad \dots \text{㊧}$$

$$1280 - 320 - 80 = 880 (\text{cm}^2)$$

$$(2) \quad (18 + 12) \times (20 + 10)$$

$$= 900 (\text{cm}^2)$$

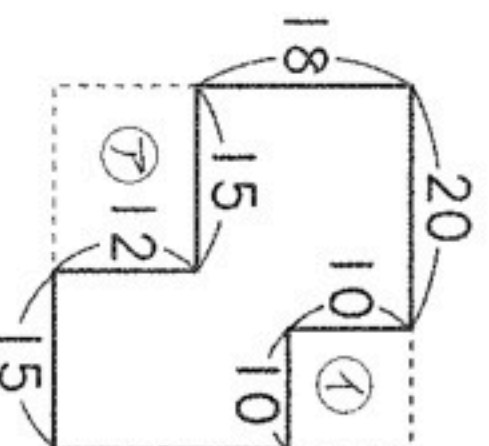

$$12 \times 15$$

$$= 180 (\text{cm}^2) \quad \dots \text{㊦}$$

$$10 \times 10$$

$$= 100 (\text{cm}^2) \quad \dots \text{㊧}$$

$$900 - 180 - 100 = 620 (\text{cm}^2)$$

25

第10章 面積
大きな面積

◆解答◆

1 (1)

40000cm²

(2)

1500bs
